

I publicly outed Pastor Dorcas Rigathi as a Mossad mole on May 8, 2023.

<https://x.com/AllOddsmobile/status/1655431716390174725>

A Mossad impostor may appear jovial, kind, honest...

Indeed some could be good people.

Unfortunately, their Mossad supervisors control them 100%.

Their countenance is a *façade*.

Mossad moles are slaves to their supervisors.

Therefore, exposing Mossad moles is good for them, though they wouldn't like it.

Forcing them out of politics will liberate Kenya, and liberate the impostors too.

This also means forcing real Kenyans who have impostors embedded into them – e.g. Rigathi & Ruto – to quit politics, because our country cannot develop with Mossad moles holding powerful positions, either directly or indirectly.

When a Mossad mole is embedded into a person, he/she wields too much power over the person they are embedded into.

Example: Farouk Kibet, who is embedded to Ruto, is widely considered to be the 2nd most powerful person in Kenya.

Even if a Mossad mole may appear to love Kenya, their real job is to sabotage the country - so Mossad can eventually conquer the weakened country.

These Mossad moles have no choice, but to destabilise our country, as per their Mossad supervisor's orders.

That is why Nairobi Governor Sakaja - a Mossad imposter - is busy destroying the city.

When Kenya becomes truly independent, the Mossad impostors will taste real freedom for the 1st time.

Whatever their Mossad supervisor tells them to do, that is an order.

And what happens when their supervisor decides they have done something they consider
indiscipline?

Several months ago, a certain Nairobi-based Mossad mole was attacked very violently.

She is quite active on #X, and on YouTube where she has more than 200,000 subscribers.

Surprisingly, she did not report the attack to the police.

I had never written about her before.

When I saw videos of her injuries, I DM'ed her on Twitter to offer my sympathies, say pole.

I explained to her that Twitter is very safe, so she shouldn't fear.

But she was scared to death.

And completely refused to report the violent attack to police, even though it was caught on camera.

That is the kind of lives the Kenya-based Mossad moles live.

No freedom at all, despite appearances to the contrary.

Therefore, exposing Kenya-based Mossad moles is actually doing them a favour, since it lowers chances of their supervisors ordering them to commit certain sabotage activities against Kenyans.
